

IF YOU THINK YOU HAVE 'FLU SYMPTOMS

Please follow the latest clinical advice.
In the first instance call NHS direct on
0845 46 47.

Callers will hear a welcome message
advising them what to do if they are
calling about Swine Flu, and will then be
able to speak to trained health advisors.

Where appropriate, callers will be
transferred to nurse advisors who will
ask a specially developed set of
questions to assess their condition and
advise on the most appropriate course of
action.

If you think you need medical advice,
please do not go to your GP, NHS walk-
in centre or other NHS premises without
telephoning first.

Thank you for your consideration of other patients

CATCH IT

BIN IT

KILL IT
